

DHC-96 CPM-HS, digital multimeter 96 x 48, 2 output relays

Code: M223B8.

- > Protocol: Modbus/RTU
- > IP: 54
- > Communications: RS-485
- > N° relays: 2
- > Digital inputs: 2
- > Analog output: 1 (20 mA)
- > System: DC (Hall)
- > Measurement Range (V):  $\pm$  150 / 300 /600 Vdc
- > Measurement Range (A): 4 Vdc
- > Paramètre: V/A/kW/kWh dc
- > Mounting: Pannel
- > Modules: 96 x 48

#### Description

Panel-mounted digital instruments that display the value of an electrical variable measured or proportional value of a process signal on its screen (depending on the model). Designed to supervise, regulate and control units with the use of relay outputs that are built in the unit.

The **DHC-96** series displays the value of an electrical variable measured or proportional value of a process signal on its screen (depending on the model). The unit displays the electrical parameters of a single-phase installation, depending on the model, such as the voltage, current, etc. In DC systems, the unit can measure the voltage, current, frequency and other variables associated with industrial processes. The AC models take the measurements in true RMS (TRMS).

All models in this range have the following features:

- Universal power supply at 80...270 V<sub>ac/dc</sub> (DHC-96-CPM: 100...270 Vac/dc) and optional power supply at 16
  ... 36 V<sub>dc</sub> (DHC-96-CPM: 20...60 Vdc)
- IP 54 protection degree on the front panel
- High measurement accuracy
- Programmable measuring input
- Alarm delays and interlockings
- Galvanic insulation between external circuits
- Self-configurable decimal point
- Installed on 96 x 49 mm panels

#### Application

These digital instruments have many different applications and can be used in:

- Industrial applications
- Air conditioning units
- Solar photovoltaic energy installations
- Industrial process control systems

Circutor

Digital instruments: Programmabled DC measurement Central

Code: M223B8.

#### Specifications

| AC power supply                          |                       |
|--|-----------------------|
| Installation category                    | CAT III 300V          |
| Consumption                              | 6 18 VA               |
| Frequency                                | 50/60 Hz              |
| Nominal voltage                          | 100270 V ~            |
| DC power supply                          |                       |
| Installation category                    | CAT III 300 V         |
| Consumption                              | 1.3 2 W               |
| Nominal voltage                          | 100270 Vdc            |
| Mechanical characteristics               |                       |
| Size (mm) width x height x depth         | 96 x 49 x 107.8 (mm)  |
| Weight (kg)                              | 0,24                  |
| Environmental characteristics            |                       |
| Relative humidity (without condensation) | ≤ 93 %                |
| Current measurement circuit              |                       |
| Installation category                    | CAT III 600 V         |
| Consumption                              | < 1 VA                |
| Nominal current (In)                     | Sensorhalle $\pm$ 4 V |
| Allowable overload                       | 1.2 In continuous     |
| Voltage measurement circuit              |                       |
| Installation category                    | CAT III 600 V         |
| Consumption                              | < 1 VA                |
| Input impedance                          | > 1 MΩ                |
| Nominal voltage                          | ± 150 / 300 / 600 Vdc |
| Maximum permanent measurement voltage    | 1.2 Un continuous     |
| Communications                           |                       |
| Data bits                                | 8                     |
| Stop bits (ModBus)                       | 1-2                   |
| Parity                                   | without, even, odd    |
| Protocol                                 | ModBus RTU            |
| Standards                                |                       |
| Electrical safety, Maximum height (m)    | 2000                  |
