

Digital laser type
DR-Q series

Easy to set up, finely adjustable laser

- | Sensing distance: Max. 4 m
- | Digital adjustment function
- | Built-in ASC (Automatic Sensitivity Correction) function

Selection table

Type	Shape	Sensing distance	Model (Models in parentheses are connector types)	
			NPN type	PNP type
Laser type		0 to 1.5 m	DR-Q150TN (DR-Q150TCN)	DR-Q150TP (DR-Q150TCP)
		1 to 4 m	DR-Q400TN (DR-Q400TCN)	DR-Q400TP (DR-Q400TCP)

● For the connector type, please purchase an optional JCN series connector cable.

Options/Accessories

Reflector

Standard (included)

P250F

Sensing distance (refer to the table to the right)
61 × 51 mm

Small (optional)

PL20F

Sensing distance (refer to the table to the right)
60 × 20 mm

Ultra-small (optional)

PL10F

Sensing distance (refer to the table to the right)
32 × 20 mm

Sensing distance when each reflector is used

	P250F	PL20F	PL10F
DR-Q400	1 to 4 m	1 to 2.8 m	0.5 to 1 m
DR-Q150	0 to 1.5 m	0 to 1 m	0 to 0.5 m

Detection of plastic bottles

Detection of glass bottles

Detection of plastic bottles in large machines

Sensing distance: Max. 4 m

Achieves long range transparent object detection

A sensing distance of 4 m, the longest class in transparent object sensors, has been realized. Additionally, by employing a red laser (Class 2) for the light source as well as a **coaxial reflection structure**, high-accuracy position detection is possible.

DR-Q150T□

Digital adjustment function

Adjustment while watching values possible

Simple settings and fine adjustments are possible. Thanks to the teaching method, setting is possible by simply pressing a button. There are also buttons for fine adjustments, making it possible to configure sensitivity settings to the desired level while viewing the digital display.

High utility

Convenient functions tailored to fit the application

- External teaching is possible
- Built-in ON / OFF / One-shot delay functions
- Enables detection of transparent containers filled with transparent liquid causing a lens effect

Built-in ASC (Automatic Sensitivity Correction) function Contamination resistant

The ASC function automatically corrects threshold values to reduce the amount of light generated when dust, water, vapor, etc., on site adheres to the reflector or lens, thereby maintaining optimum sensitivity over long periods of time. (The diagram below shows a decrease in the amount of light received due to dust and steam in the atmosphere)

<Conventional models>

<DR-Q>

- Teaching level by way of reflector
- Receiving light quantity
- Threshold (borderline of ON/OFF)

Specifications

Type			Sensor head for amplifier separate type	
Model	NPN	Cable type	DR-Q150TN	DR-Q400TN
		Connector type	DR-Q150TCN	DR-Q400TCN
	PNP	Cable type	DR-Q150TP	DR-Q400TP
		Connector type	DR-Q150TCP	DR-Q400TCP
Sensing distance			0 to 1.5 m ⁻¹	1 to 4 m ⁻¹
Light source			Red semiconductor laser Class 2 (IEC/JIS/FDA*) Wavelength: 650 nm Pulse width: 4 μs Maximum output: 2 mW	
Spot size			Approx. ø15 mm at a distance of 1.5 m	Approx. ø20 mm at a distance of 3.5 m
Response time			Can be switched to 0.35 ms, 0.7 ms, 2 ms, or 5 ms	
Distance adjustment			Teaching method	
Threshold adjustment			Manual adjustment is possible after teaching	
Indicators			Output indicator (orange LED), laser emission indicator (green LED)	
Digital display			7-segment, 3-digit display	
Control output			NPN/PNP open collector Max. 100 mA / 30 VDC	
External input			Laser OFF input or teaching input (selectable by setting)	
Timer function			ON delay / OFF delay / One-shot 0 to 999 ms (setting is possible in 1 ms increments), 1 to 10 s (setting is possible in 1 s increments)	
Output mode			Light ON / Dark ON selectable by setting	
Connection type			Cable type: Cable length: 2 m (ø4 mm) / Connector type: M8, 4-pin	
Insulation resistance			20 MΩ or more (with 500 VDC)	
Rating	Supply voltage		10 to 30 VDC, including 10% ripple (p-p)	
	Current consumption		35 mA or less	
Applicable regulations			EMC directive (2014/30/EU) / FDA regulations (21 CFR 1040.10 and 1040.11) (except for deviations pursuant to Laser Notice No.56)	
Applicable standards			EN 60947-5-2	
Company standards			Noise resistance: Feilen Level 3 cleared	
Environmental resistance	Ambient temperature/humidity		-10 to +40°C / 35 to 85% RH (no freezing or condensation)	
	Ambient illuminance		Sunlight: 10,000 lx or less Incandescent light: 3,000 lx or less	
	Vibration resistance		10 to 55 Hz; double amplitude 1.5 mm; 2 hours in each of the X, Y, and Z directions	
	Shock resistance		Approx. 50 G (500 m/s²), 3 times in each of the X, Y, and Z directions	
	Degree of protection		IP67 (IEC 60529)	
Material			Housing: ABS Lens front cover: PMMA	
Weight without cable			Approx. 20 g (excluding cable)	
Included accessories			Mounting bracket: BEF-WK-190 Reflector: P250F	

*1. With the P250F reflector

*2. In accordance with the FDA provisions of Laser Notice No. 56, the laser is classified as Class 2 per the IEC 608251:2014 standard.

● Specifications are subject to change without prior notice for product improvement purposes.

I/O circuit diagram

NPN output type

PNP output type

Connector type

Connecting

- When not used for external input, cut the lead wire and wrap it individually with insulating tape, and do not connect it to any other terminal.
- ① to ④ are connector pin No.

Notes

- When using a switching regulator for the power supply, be sure to ground the frame ground terminal.
- Because wiring sensor wires with high-voltage wires or power supply wires can result in malfunctions due to noise, which can cause damage, make sure to wire separately.
- Avoid using the transient state while the power is on (approx. 100 ms).
- The connector direction is fixed as in the drawing below when you use L-shaped connector cable. Be aware that rotation is not possible.

Operation mode

*The operation mode is the same for NPN output and PNP output.

Notes for sensor usage

This product emits a Class 2 (II) visible laser beam that is compliant with JIS C 6802/IEC 60825- 1/FDA laser safety standards.

Warning and explanation labels are affixed to the sides of the sensor.

Warning

Do not look directly at the laser or intentionally shine the laser beam in another person's eyes. Doing so may cause damage to the eyes or health.
